## PROFESSIONAL PROFILE

---

- **Context Dimension:** The industry is saturated with specialists who have followed predictable career trajectories, creating a shortage of engineers who can bridge multiple technical domains. Organizations consistently struggle to find professionals who understand both the granular technical details and the broader architectural implications across traditionally siloed disciplines.
- **Experience Dimension:** I bring three decades of cross-domain expertise spanning the entire software engineering ecosystem, from low-level systems programming and infrastructure automation to application development and enterprise architecture. This breadth enables me to identify solutions and optimize systems in ways that specialists confined to a single domain cannot.
- **Cognitive Dimension:** I thrive in high-pace, rapidly evolving environments that require continual learning and absorbing large amounts of information, and really enjoy identifying abstract connections. This has served me well in time-sensitive, high-pressure situations where understanding the underlying root cause quickly can mean the difference between a minor incident and a major outage.

There are two sides to every coin, and every strength is also a weakness in the wrong situation. My three decades of experience have taught me that in order to truly know what a tool does well, you must first understand what it doesn't do well. For me, I thrive on complex challenges and novel problems but struggle with monotonous maintenance work - I'm probably not the best tool for the job if you're looking for someone to maintain and operate stable, predictable systems without innovation or evolution... **though I would love to build them for you.**

## CROSS-DOMAIN DISCIPLINES

---

## PROFESSIONAL EXPERIENCE

---

### BITBUILDER CLOUD, LLC

Dallas, Texas

### FOUNDER, CLOUD ARCHITECT, CIO

2021 - Present

- Launched a web hosting and cloud consulting private SaaS company using 5 highly customized AMD & Dell based co-located servers.
  - Single-handedly built core services on colocated custom bare metal servers with over 2TB RAM, 320 cores, 64TB NVMe storage.
  - Containerized and load-balanced several high-profile organizations with 1M+ global visitors/day.
  - Orchestrated global scaling via multi-cloud hybrid overlay layer based on custom k8s distribution and immutable Linux systems.
  - Implemented constant monitoring and observability using Grafana, Prometheus, VictoriaMetrics, NetData, and Jaeger.
- 

### FIDELITY INVESTMENTS

SouthLake, TX

### PRINCIPAL SOFTWARE, DEVOPS, AND CLOUD ENGINEER

2023 - 2025

- Architected comprehensive AWS solutions for enterprise applications, including designing secure networking topologies and multi-account strategies
- Developed and implemented robust IAM policies and CloudFormation templates adhering to strict financial industry security standards
- Designed and built a full AWS CDK platform enabling teams to rapidly deploy standardized, compliant infrastructure
- Engineered Kubernetes-based deployment solutions leveraging EKS, Helm charts, and custom operators for application management
- Rebuilt and optimized the Jenkins Core platform, increasing build efficiency and reducing pipeline execution times
- Created a cloud orchestration CLI tool that simplified cross-account resource management and deployment workflows
- Successfully deployed and managed Discourse forums on Alpine Linux containers in Kubernetes, ensuring high availability and performance
- Implemented infrastructure-as-code practices across multiple teams, significantly reducing configuration drift and deployment errors
- Designed and implemented automated security scanning and compliance checking within CI/CD pipelines
- Led knowledge-sharing sessions and developed documentation to elevate team capabilities in cloud-native technologies

---

## RSVP & ACT, INC

Denton, TX

## SRE, SYSADMIN, AND PLATFORMS ENGINEER

2019 - 2021

- Managed and performance-tuned +3.5TB postgresql database cluster, MySQL and SQLite databases
- Architected, deployed, and managed dynamically scaling, secure, and fully version-controlled hybrid and bare-metal kubernetes clusters
- Deployed and managed self-hosted gitlab instance with DevOps build pipelines and automatic blue-green deployments
- Implemented monitoring, alerting, logging, tracing, and observability tools
- Implemented and enforced gitlab-based Infrastructure-as-Code procedures and pipelines
- Deployed and managed multiple host, network, and container security tools and vulnerability scanners
- Simplified and standardized hypervisors with a centralized Proxmox cluster on ZFS and a 56G InfiniBand FC SAN
- Deployed W2019 AD server environment for centralized user account management
- Implemented organization-wide VPN, VLANs, and security measures
- Provided training to address knowledge-gaps and mitigated ransomware hacks

---

## PERSPECTIVES.ORG

Pasadena, CA

## IT DIRECTOR

2017 - 2019

- Developed 5 year vision, roadmap, and project plan to rebuild legacy monolithic .NET 3.5 application.
- Increased cloud hosting capacity by 10x while reducing budget by 50% through strategic optimization.
- Reduced minimum page load time from 5 seconds to an average of 0.8 seconds.
- Built a DRM-secured offline-enabled streaming video player desktop app in Go.

---

## AT&T CORP.

Plano, TX

## PROFESSIONAL APPLICATION DEVELOPER

2014 - 2017

- Full stack application engineer building custom web-based tools and services for enterprise operations.
- Managed entire project pipeline, from requirements gathering to production deployment.
- Led team-wide migration from Rails/MySQL stack to Node.js, Angular.js, and MongoDB.
- Engineered a Docker-based DevOps and deployment pipeline for microservices architecture.
